

1 5 Uneven Splitting Splitter

Overview

Feature highlights: Uneven PLC Fiber Splitter with low insertion loss and high reliability, operating across 1260nm-1650nm wavelengths. Compact design supports FTTH networks, LAN, CATV, and PON applications. 20/80, 33/67, 50/50, 75/25, or 95/5 Split Ratios Available Low Insertion Loss and Low Polarization Dependent Loss Fully Passive Optical Branching Device Compact Housing Fits Racks, Wall-mounted Boxes, Optical Distribution Boxes, etc. 1260~1650nm Broad Operating Wavelengths More Specifications. An Even Splitting splitter divides the optical power equally among all output ports. Key Points Insertion Loss: Theoretical loss ≈ 6 dB per port; real devices add up to ~ 7 dB due to excess loss. Utilizing advanced silica waveguide technology, these splitters are ideal for PON, datacom, and other high-quality network. Dawnergy's chip type uneven planar light wave circuit (PLC) splitter using special chip instead of fusion splicing, the output of the optical splitter can be divided into 70/30% or 85/15% unevenly. Asymmetrical optical splitters can reduce the consumption of optical fibers by about 50% to 80% in. The FTTR (Fiber to the Room) GPON PLC Splitter is an integral component of Huawei's FTTR solutions.
