

# Australian optical transmitter 10G

## Overview

The Arista SFP-10G-LR is a 10GBASE-LR SFP+ optical transceiver module designed for high-speed data transmission over single-mode fiber. Operating at 1310nm wavelength, it supports link distances up to 10km via LC duplex connector. The multirate XFP supports both 10GBASE-LR and 10GBASE-LW Ethernet applications and OC-192/STM-64 Short-Reach (SR-1) POS applications. 3ae and SFP+ MSA standards, this. Home » Australia's OptiComm to build 10G XGS-PON with ADTRAN OptiComm, which is the largest private competitor to Australia's NBN, is in the final stages of developing the nation's first 10G XGS-PON. The plan is to deliver residential service at a nominal line speed of up to 1 Gbps, and commercial. The latest NBN trial shows how operators can easily enhance 10G PON to symmetrical 25G PON and eventually evolve to 50G PON or 100G using the same passive and active fiber components.
