

Cable tray support and hanger location

Overview

Support Methods: Common support methods include trapeze hangers, which are used for ceiling suspensions, and cantilever wall brackets, which are mounted directly to walls for runs along vertical surfaces. The choice depends on the building structure and the planned tray . This publication is intended as a practical guide for the proper and safe* installation of cable ladder systems, cable tray systems, channel support systems and associated supports. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to si osure, overheating or. Establishing partnerships with cus-tomers is a top priority for OBO, and OBO staff are available to support customers in all aspects of their pro-jects, including products, installation and planning advice. During forklift offloading on uneven ground, one must exercise extreme caution to prevent load shifting. It contains the wires in a secure, tidy, and elevated state.
