

Cable trays running along the ceiling

Overview

To run cables in drop ceilings, use flexible cable trays or conduit above the tiles, and keep cables organized for easy access. Most tech teams secure cables with zip ties and clips. Loose cable groups in a ceiling, in raised flooring, or along a wall, can easily become uncontrollable and hazardous. The grid. This publication is intended as a practical guide for the proper and safe* installation of cable ladder systems, cable tray systems, channel support systems and associated supports. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support. Hubbell's NEXTFRAME® Ladder Tray is the effective and widely used cable runway that supports and delivers bundles of cable between cabinets, racks, and closets, along walls, and suspended from ceilings. The Ladder Tray features light, rugged, tubular steel construction.
