

Canadian manufacturer s long-distance optical cable OS2

Overview

100G OS2 Single-Mode Fiber Cables are the highest performing fiber optic cables currently available, with further distances than multimode specifications. OS2 fiber can transport data at 100G for up to 10km using a 1310nm transceiver, or up to 40km using a 1550nm transceiver. Mouser offers inventory, pricing, & datasheets for OS2 Fiber Optic Cables. When distance is beyond 550m, single mode fiber is preferred. Price—Multimode. As a professional fiber optic cable manufacturer and OEM supplier, Getek provides a full range of custom fiber cables that meet ISO/IEC and TIA standards, including EN 50173, ISO/IEC 11801, IEC 60793, ITU-T G. OS1 vs OS2: What's the Difference?

OS2 is an advanced version designed. Fiber patch cables provide interconnect and cross-connect of applications over data centers, telecommunication networks, and enterprise environments. Pre-terminated cables allow for the implementation of complete plug & play solutions to install even large cabling systems rapidly. A1 bend-insensitive fiber and low-loss UPC/APC connectors, these patch cords support transmission.
