

Central Asia Metal Cable Tray Production Line

Overview

HCM-600 Cable Tray Automatic Production Line is a cable tray roll forming line that adopts metal sheet coils as raw material. It forms the sheet into specific shapes and specifications through decoiling, leveling, punching, notching, and roll forming. The whole cable tray production machine adopts. Our advanced cable tray production line is engineered to provide automated forming, punching, and cutting processes for various types of cable trays, including perforated, ladder, and solid-bottom trays. With high precision, fast production speed, and stable performance, it helps manufacturers. Asia is home to some of the world's most reputable cable tray manufacturers, offering solutions that meet the diverse needs of industries across telecommunications, construction, energy, and more. It is also pretty helpful for cable managing system. So adding new cables or removing the old cables are becoming pretty. Cable support systems have been installed in almost every facet of industry from simple installations supporting cables around a factory wall to major projects such as power stations, oil refineries, aluminium smelters, coal loaders, petro-chemical refineries, grain terminals, major commercial. We design and produce complete cable tray production lines, to produce cable trays.
