

Comoros Optical Receiver

Overview

For CATV FTTH applications, this mini optical receiver offers flexibility in operation and maintenance. Its GaAs FET technology provides low distortion and a flexible input level along with low power consumption and surge design in a bi-directional application. Fiber-optic communication is a form of optical communication for transmitting information from one place to another by sending pulses of infrared or visible light through an optical fiber. The light is a form of carrier wave that is modulated to carry information. As an innovative telecom satellite company, we offer tailored, end-to-end telecommunication solutions to Comoros's media and broadband industries with innovative broadcast and. Market Forecast By Type (Fiber Optic Switches, Optical Transmitters, Wavelength Division Multiplexers, Others), By Component (Transceivers, Optical Amplifiers, Cables, Others), By Application (Broadband, Telecom, Industrial, Others), By End Use (Data Centers, Enterprises, Government, Residential). Mostly, OFC (optical fiber communication) plays an essential role in the telecommunication system development with a high speed as well as quality.
