

Core switch of China-Africa Network RG-S7808C

Overview

Ruijie RG-S7808C is a high-performance modular Layer 3 core switch used in enterprise campus networks, MANs and data centers. The RG-S7808C features a 10 RU chassis with 2 supervisor modules and 6 line card slots for flexible and scalable solutions to keep up with the needs of. Compact chassis design with a height of 10 RU improves cabinet space utilization. A single card supports up to 52 non-combo ports, meeting the networking requirements of small and medium-sized core networks or medium-sized network aggregation scenarios. CPU Protection Policy (CPP) controls the. Ruijie Switches - Introducing the RG-S7808C, a Next-Gen 8-Slot Chassis Campus Core Switch. It. Chongqing Chimu Technology Co. was established in 2011, we have been engaged in this industry 11 years. Relying on 11 years of deep experience in the communication field and scientific and technological innovation ability, through the integration of multi-brand, full series of communication. Ruijie RG-S7808C Core Switch is specially designed for next-gen integrated network. Leveraging advanced CLOS multi-stage multi-plane switching architecture.
