

# Data center network cable overhead cable tray

## Overview

Trough trays work well for lots of cables close together and help block electrical noise. Perforated trays (or 'tray' type) are good for long gaps between supports or holding heavy. The Wire Basket Overhead Cable Tray Routing System is a robust cable management solution that optimizes system reliability, space utilization and scalability. It provides speed of deployment, structural integrity, cable protection and ease of use to drive business results. The wire basket is up to. Explosive demand for network services has led to increased adoption of overhead cable management systems. Designed for efficient cable routing and organization, our selection includes cable trays, ladder racks, and overhead brackets that help maximize floor space while maintaining a tidy and. Basorfil is the ideal product for supporting cable in the rapidly changing voice/data/video market. In these environments, there is no “extra” room.
