Distribution Box 6070

Overview

Flush mounted enclosure with 24 (2x12) modules from SCHNEIDER ELECTRIC (Easy9) suitable for residential and office buildings. Opening angle of the front cover - 150 ˚. Heat and impact resistance body. This description is only intended for the use of trained specialists in control and automation engineering who are familiar with the applicable national standards. It is essential that the documentation and the following notes and explanations are followed when installing and commissioning these. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. It is primarily designed to distribute electrical power from one or more primary power. This code is part of the latest version of Uniclass. 42, April 2026 No current codes. Contains codes that are not in use. An enclosure which includes mounts, and protects such items as switches, circuit breakers, jacks, fuseholders, connectors, terminals and/or terminal boards, resistors, capacitors, transformers, and the like.
