

Distribution Box GGD Brand

Overview

GGD type AC low voltage distribution cabinet is suitable for power plants, substations, factories, and mine enterprises whose distribution system is with 50HZ AC to 3150A rated working current, used for power change, distribution, and control of power, lighting, and power. GGD type AC low voltage distribution cabinet is suitable for power plants, substations, factories, and mine enterprises whose distribution system is with 50HZ AC to 3150A rated working current, used for power change, distribution, and control of power, lighting, and power. It is suitable for communities, shopping malls, schools, supermarkets, substations, industrial enterprises and other power users, with AC 50Hz, rated voltage 400V, 690V, rated current 1000 ~ 3150A power distribution system, used for power conversion, distribution and control device of the power. GGD type is used in the distribution of low voltage power in different power plants, mining enterprises, and transformer substations. These low voltage power distribution boxes are designed to offer incredible service and ensure that your electrical needs are met. It is used by power plants, substations, and industrial enterprises for the conversion, distribution, and control of electric energy for power. GGD AC LV distribution cabinet is suitable for power plant, power station, mining and industrial enterprises to transfer, distribute and control the powering AC 50Hz, 380V 660V rated working voltage, 3150A rated current lighting and distributing equipment. Equipped with advanced production.
