

# Distribution box with fire-fighting temperature control

## Overview

Advanced fire rated junction boxes incorporate thermal barriers and heat-dissipating elements that manage temperature buildup during normal operation and emergency situations. ABB offers an innovative enclosure system for fire prevention, which is constructed of fireproof materials, features optimum technology and is available in a variety of economical designs. STAHL's system solutions allow electrical energy to be safely distributed and controlled in hazardous areas. Thanks to our modular system, the right solution for any application is just. The invention provides an intelligent fire protection system for a distribution box and a method thereof, which belong to the technical field of distribution box monitoring and are suitable for the end of the distribution system such as shopping malls, homes, factories and other places. They are classified for Zones 1, 2, 21 and 22.
