

Ecuadorian Optical Line Terminal OSFP

Overview

The OSFP (Octal Small Form-Factor Pluggable) is a pluggable transceiver form factor designed to support 8 electrical lanes, each carrying high-speed signals. OSFP-400G: $8 \times 50\text{G PAM4} = 400\text{G}$. Designed to support 28G NRZ, 56G PAM4, 112G PAM4, and 224G PAM4. This specification defines the electrical connectors, electrical signals and power supplies, mechanical and thermal requirements of the OSFP Module, connector and cage systems. These input/output (I/O) solutions support aggregate data rates up to 1. Unlike the backward-compatible QSFP-DD, OSFP introduces a slightly larger mechanical form to. The Cisco® OSFP 800G transceiver modules provide 800 Gigabit Ethernet (GE), 2x 400GE, 4x 200GE, and 8x 100GE connectivity options, complying with the Octal Small Form Factor Pluggable (OSFP) MSA for pluggable transceivers. The modules comply with the OSFP MSA configuration with integrated closed. Amphenol is leading the industry in OSFP cable development.
