

FX100 Fiber Optic Sensor Settings

Overview

We have separated the settings into three levels: RUN mode, SET mode, and PRO mode, making operation simpler and easier. Simply inputting the default setting "code (number)" will enable sensor settings. In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc. tion applicable in each region or country. Fit the rear part of the. SUNX FX-100 Series Digital Fiber Sensors Instruction Manual Thank you very much for using SUNX products. Kindly keep this manual in a convenient place for quick reference. The dual digital display allows users to check both the threshold value and incident light intensity at the same time, allowing. The digital dual-display shines out in the workplace! The digital dual-display allows you to check both the threshold value and incident light intensity at the same time, and it also makes the procedures for setting the various values much easier. The threshold values can be adjusted simply by.
