

Fiber Optic Communication Project Management Process

Overview

The paper relies on the Fiber Optic Association (FOA)'s processes, procedures, standards, and best practices to illustrate how fiber optic project management processes fit into the PMI's standard project management framework described in the PMBOK® Guide- Fourth Edition. The Project Management Institute (PMI) is the world's leading not-for-profit professional association for the project, program, and portfolio management profession. PMI strives. This comprehensive guide shows proven project management methods for fiber optic projects and helps telecommunications providers and municipal utilities to successfully implement their FTTH projects. Whether you are installing, upgrading, or maintaining fiber optic networks, you need to have the right skills, tools, and methods to ensure quality, efficiency, and safety.
