

Fiber Optic Router Huawei FC

Overview

This router enables users to enjoy ultrafast internet speeds of up to 4 Gbps with Wi-Fi 6 technology. The CPE is equipped with four dual-band antennas that enhance signal strength, making it suitable for dense urban areas where reliable connectivity is crucial. The Chinese company Huawei has developed a fiber optic installation system for private households: Fiber-to-the-Room (FTTR). The FTTR system consists of a central unit (Master FTTR). An optical fiber is a carrier of optical signals and transmits optical signals over a short distance. Retailers are now selling all necessary components. Huawei's FTTR main device OptiXstar V166a20 is essentially a Wi-Fi router. The Chinese manufacturer Huawei is now also selling its network package for so-called Fiber to the Room. With the rapid growth of bandwidth-hungry services such as 4K, 8K, VR, and HD video, the fiber to the home (FTTH) industry has attracted wide attention from operators, and is now in a period of explosive growth. Huawei's innovative FTTH solution has been adopted by more than 350 leading global.
