

Finland PV Combiner Box 200kW Solution

Overview

With 8 built-in MPPTs and support for up to 8 ways PV strings, it handles a maximum PV power of 200kW and a robust 160A input current (20A per string). This integration eliminates the need for separate components, simplifying installation and reducing costs. Combi Works is a specialized service provider in industrial manufacturing, offering scalable solutions for the heavy machine building industry. Their diverse production network and services, including welding and assembly, enable efficient supply chain management. At the same time, the design enables an easy, fast and safe. The new PV AC combiner boxes have been designed for PV systems with string inverters in trackers or fixed-tilt systems. The product line is suitable for inverters from 60 kW to 200 kW and supports voltages of 400 V, 690 V or 800 V AC. The combiner boxes allow to collect from 2 up to 6 string. The ATESS SMC200 is a groundbreaking 1500V-level smart MPPT controller designed to transform large-scale solar projects. Additionally, it facilitates efficient execution of regular. Expert insights on photovoltaic power generation, solar energy systems, lithium battery storage, photovoltaic containers, BESS systems, commercial storage, industrial storage, PV inverters, storage batteries, and energy storage cabinets for European markets Who is Sun Power Industries Sdn.
