

Fire protection of outdoor integrated communication cabinet

Overview

These cabinets can house fire suppression systems such as compressed air foam (ICAF), clean agent (FK-5-1-12), deluge and preaction systems designed to rapidly suppress fires without causing additional damage to critical equipment. Outdoor communication cabinets play a vital role in safeguarding critical equipment in commercial environments. Telecommunications facilities, including data centers, switching stations, and network hubs, house critical. Effective outdoor cabinet system integration is crucial for maintaining the reliability and performance of critical emergency infrastructure at base stations. Our cabinets are built to withstand harsh weather conditions and provide excellent protection for power. Electrical & IT cabinets are widely used in industrial applications, and are very varied in their application, type and voltage levels.
