

# Fire safety standards for park electrical distribution boxes

## Overview

BS 7671 requires, in Section 421 (Protection against fire caused by electrical equipment), that equipment must not present a fire hazard to adjacent materials, and that manufacturers' instructions must be taken into account. With the introduction of the 15th Edition of the IEE Wiring Regulations in 1981 the UK aligned the requirements of the regulations with the International Electrotechnical Commission (IEC) worldwide electrical installation standard IEC 60364. The installation engineer is required here. And it is here where there are requirements which cannot be implemented without further work. 73 MB, 96 pages This file may not be suitable for users of assistive technology. If you use assistive. In the event of a fire, only absolutely reliable products prevent the spread of fire and guarantee safe function of electrical systems relevant for rescue and escape in buildings and tunnels, such as emergency lighting and smoke extractor systems in escape and rescue routes.
