

# Four-core optical cable yellow

## Overview

● LC to LC or SC to SC ● Single-mode /multimode for option ● OM3 for multimode ● Optical Fiber 4 Cores Inside ● Compatible with all standard fibre optic equipment and connectors ● Stainless Steel sheathed and metal braiding strengthened ● Ceramic ferrule ensure low signal loss● LC to LC or SC to SC ● Single-mode /multimode for option ● OM3 for multimode ● Optical Fiber 4 Cores Inside ● Compatible with all standard fibre optic equipment and connectors ● Stainless Steel sheathed and metal braiding strengthened ● Ceramic ferrule ensure low signal lossBy adopting the TIA/EIA-598C standard, you gain a universal “language” of colors that speeds identification, reduces miswiring, and enhances safety across cable jackets, connectors, buffer tubes, and splice trays. Error Reduction: A standardized palette prevents costly mis-splices and. Fiber Optic Cable, Outdoor Micro Cable for Air-blown installation, Central Tube All-Dielectric Fiber Optic Cable, Outdoor Micro Cable for Air-blown installation, Stranded Loose Tube All-Dielectric Fiber Optic Cable, Indoor/outdoor Low Smoke Zero Halogen, Central Tube Armored Fiber Optic Cable. BLACK-STONE Tight Buffered Distribution Cable distribution cables are available in fiber counts from 2 to 144. These highly popular cables are designed for both indoor & indoor/outdoor applications. Distribution cables are available in plenum, riser, unitized & non-unitized constructions which fit. Fiber color codes are the standardized color sequences used to identify optical fibers, buffer tubes, cable jackets, and connector types across all optical communication networks.
