

GCS technical services for low-voltage complete sets of equipment

Overview

GCS Tech technicians are experienced pros at properly installing cable and low-voltage wiring. We specialize in servicing complex business like doctors offices, banks and technology corporations with high bandwidth cables for their data, surveillance and communication needs. New or old. It is suitable for power distribution systems in power plants, petroleum, chemical, metallurgy, textile, high-rise buildings and other industries. In large power plants, petrochemical. equipment") is my company to meet the requirements of the design unit and power users design developed in line with the national conditions, with high technical performance indicators and can adapt to power market development needs and can compete with the introduction of existing product low. LV Switchgear GCS Power Distribution, with three-phase AC frequency 50 (60) Hz, rated working voltage 380V (400), (600), rated current 4000A and below.
