

Ggd distribution box casing

Overview

The GGD type AC low-voltage distribution cabinet is suitable for power distribution systems of power plants, substations, industrial and mining enterprises, and other electrical users with an AC frequency of 50Hz, a rated operating voltage of 380V, and a rated operating current. The GGD type AC low-voltage distribution cabinet is suitable for power distribution systems of power plants, substations, industrial and mining enterprises, and other electrical users with an AC frequency of 50Hz, a rated operating voltage of 380V, and a rated operating current. GGD type AC voltage distribution cabinet is based on the requirements of the Department of energy, the majority of users and the design department, according to the safe, economical, reasonable and reliable principle design. The products has features of high breaking capacity, good thermal. The enclosures of this series of GGD-type low-voltage distribution cabinets are designed and manufactured in strict accordance with national standards such as GB/T 7251. 1 Low-Voltage Switchgear and Controlgear - Part 1: General Rules. It is designed for ease of use, simple maintenance, and maximum operational uptime, making it a preferred choice for a wide range of AC 380V distribution networks. Features a. GGD Low voltage fixed switchgear (hereinafter referred to as "distribution cabinet") is suitable for power users such as power plants, substations, industrial and mining enterprises, etc as power, lighting and power conversion, distribution, and control of distribution equipment in the distribution.
