

Grounding reservation for civil defense distribution box

Overview

26 mm² (10 AWG) ground wire must be used, and in all other markets a 6 mm² must be used. IBILITY: Publications and forms are available for downloading or ordering o rements for electrical grounding systems, including systems for equipment grounding, lightning protection, and static protection. This AFMAN also implements the maintenance requirements of Department of Defense DoDM. This UFC supersedes UFC 3-520-01, dated 06 October 2015. This TC is intended to supplement detailed grounding and safety information found i doctrine publications and equipment technical manuals. Grounding is a basic communications procedure, each Soldier should know how and why to perform. Power from factory ground must be installed by a qualified electrician. Each DISTRIBUTION BOX and controller must be grounded. Electrical noise reduction is discussed as it relates to the proper installation of ground systems. Be sure to include POCs for each area.
