

Guardian Wireless Module

Overview

Designed for today's high speed serial SCADA & Telemetry applications, Guardian wireless modems provide a transparent 19200 bps serial digital link in a 25 kHz channel, or a 9600 bps digital link in a 12.5 kHz channel that is compatible with most protocols. Selectable operating modes. A guardian module is add-on hardware that incorporates an Azure Sphere chip and physically attaches to a port on a "brownfield" device—that is, an existing device that may already be in use. The Guardian-400 Serial or. Guardian Industrial Grade Serial Wireless Modem and Analog Radio. Selectable operating modes provide flexibility: RS-232, RS-422, and RS-485 compatible; simplex, half-duplex or. We will introduce you to Advantech's new joint product with Microsoft, WISE-4250AS, a dual-band industrial WiFi I/O module with Azure Sphere. You will get a better understanding of how Advantech brings the high-security requirements of the Internet of Things to the industrial control field through.
