

Has Bangladesh been connected to fiber optic cables

Overview

Bangladesh currently has 150,000 kilometres of fibre optic cable, 75% of which is overhead and highly vulnerable to natural disasters, according to Faiz Ahmad Taiyeb, special assistant to the Chief Adviser for the Ministry of Posts, Telecommunications and Information Technology. Speaking at. But in this piece, I will be focusing on the fiber optic cable based digital infrastructure which is known as the backbone of the digital economy. Back in 2009, the then Government had introduced a license named National Telecommunication Transmission Network (NTTN). Two private companies were. Rather than using protectionist regulations, Bangladesh needs to allow the open market to solve the lack of strength of fibre cables and remove the bar on the mobile operators to lay their fibre Only around 25%—30% of Bangladesh's network sites are connected to fibre optic cables. Photo: Bloomberg. Key Insight: By 2026, Bangladesh has expanded its fiber optic network coverage to approximately 65% of urban areas, significantly boosting internet speeds and accessibility. This expansion is fundamentally changing how.
