

How many disks are in a 144 optical distribution box

Overview

This 144C modular ODF is composed of 12pcs pre-loaded 12C splicing and patching unit that includes FC/SC/ST/duplex LC compatible adaptors, pigtailed and 12 core splice tray. Integrated design provides OSP cable fibers and pigtail splicing, patch-cord termination and storage. Capacity of 144 optical connectors Connector holder SC, E2000 SAFeTNET cassette system Maximum number of modules: 6 Placement of optical fiber reserve, length 6 m Cable holder. Fiber Management Tray also called ODF Distribution Box, Integrated Splicing and Distribution ODF. It is mainly used for cable inlet, grounding and fixing and the splicing between the terminal end and pigtail. 144 Cores ODF Unit is pre-assembled with couplings and pigtailed and splice cassettes and Fiber Optic ODF has an integrated fiber guiding. The fiber distribution box, a crucial component in optical fiber networks, serves a dual purpose of managing and protecting optical fibers while facilitating their efficient distribution. The application of such a system is in rooms where maximum flexibility is required (typically in computer centre, sub network). 19" Sub rack of 1HU for up to 3 compact plug in modules with max.
