

How much does a 1 8-meter network cabinet weigh

Overview

This equipment can weigh up to 1,800 pounds. Increasing densities put the physical data center infrastructure under pressure to support more heavy equipment. Data center managers must ensure that their racks and cabinets can handle the weight. Common uses include computer servers, telecommunications. The static total load capacity of both mounting rails is 15,000 N (3372 lbs. 3") Rack with caster: 600 x 1,000 x 2,135 mm (23. 7") Packaging: 209 kg (460 lb) Rack: 164 kg (361 lb) SPCC steel Doors/side panels; 1. 05") Main body/posts: 2 mm. For Home and Small Office Use: We recommend starting with an enclosed wall-mounted network cabinet if you have limited space, or a floor-standing cabinet if you need more capacity. This gives you flexibility as your network grows. TABLE 2-3 lists the weight of an empty cabinet and the maximum weight of each component.
