By checking module health, compatibility, and digital diagnostics, you can quickly confirm correct installation, detect optical problems, and maintain accurate hardware inventory. com, our Cisco-certified engineers help enterprises monitor, test, and manage optical transceivers. I know that "show cable-diag tdr int [slot/port]" command can check 10/100/1000 ethernet link. But I can find any command to check gigabit only ethernet link. for example WS-X6724-SFP Is there no command to check fiber link?
