

Huawei router cannot be directly connected to fiber optic cable

Overview

Fiber optic cables cannot directly connect to the router. However, the router can work with a fiber optic modem. You can first connect the optic cable to the modem's optic cable port, and connect the modem's LAN port with the router's WAN port using an. If the router's indicator is steady red, it is not connected to the Internet. On the Home page, check whether the " No Internet cable detected " message is. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid. The reason I ask, is that the customer service rep for Ziplly says that I will not need to purchase a modem and that the router I linked them: link will be able to be hooked up straight to the fiber they are installing. This doesn't sound right and my googling makes me think this is wrong.
