

Intelligent PDU Remote Management

Overview

Our Intelligent PDUs give you complete visibility and control over your power infrastructure — whether you're across the building or across the globe. Reboot locked-up servers, routers, and network equipment remotely. Remote power control, real-time energy metering, SNMP/Modbus integration. From basic reliable power distribution to advanced. Synaccess has been a trusted provider of power management solutions for over 20 years, delivering advanced Power Distribution Units (PDUs) designed for remote power control and monitoring. nVent is the world leader in OEM smart iPDU design and manufacturing. These systems enable outlet-level visibility, remote power control, and integration with monitoring platforms, supporting modern requirements for distributed. An intelligent PDU (iPDU) is a rack-mounted power distribution unit equipped with embedded intelligence to monitor, measure, and control power delivery at the rack, outlet, or phase level.
