

Is it dangerous if the electrical box makes a noise

Overview

A buzzing noise coming from your electrical panel, often called a fuse box or breaker box, should be treated with urgency because it represents an electrical fault that is abnormal and potentially hazardous. Letting the problem go unaddressed could lead to further complications and even pose a safety risk. In fact, according to the National Fire Protection Association, fire. Whether you're turning on a light or plugging something in, you don't expect the electrical system itself to make any noise. It is almost certainly some kind of electrical fault, and it needs to be identified and rectified as quickly as possible. If you ignore it. When it starts making noise—especially unfamiliar buzzing, humming, or clicking—it's trying to tell you something. These sounds may seem like minor annoyances at first, but they can signal serious electrical issues, especially in older homes. A faint hum you can only hear right up against the panel is often just electrical current flowing through wires. But signs you should take seriously: When those occur, you should act.
