

Israel receives fiber optic cable

Overview

The Ministry of Communications is preparing for the gradual shutdown of outdated copper and cable networks, which have so far been used for telephony and television services by Bezeq and HOT, as the country moves toward full adoption of fiber-optic networks by the end of 2030. For the first time, homes in the City of the Patriarchs are connected to broad band Internet. The shutdown will. Four projects meant to connect Europe and Asia via Israel are being hampered by both external and local obstacles. Israel is meant to be at the center of at least four international telecommunications projects (if the participation of the Eilat-Ashkelon Pipeline Company in one of them counts) and. In a bold move to enhance regional connectivity, Israel has unveiled plans to construct a remarkable 254-kilometre (158-mile) fibre-optic cable spanning from the Mediterranean to the Red Sea. Israel's Communications Ministry announced on Tuesday the installment of a fiber-optic. Fiber optic company IBC Unlimited concludes 2022 with an addition of approximately 365,000 households; Over 1,100,000 households are connected to the company's network in about 100 towns with over 30% penetration country-wide The optical fiber company IBC Unlimited summarized the year 2022 and.
