

JXF Series Distribution Box

Overview

It is used in the AC 50Hz power, lighting and circuit systems with the voltage of 500V and below for power distribution control, monitoring and metering protection, mainly suitable for many places such as industrial and civil buildings, industrial and mining enterprises . It is used in the AC 50Hz power, lighting and circuit systems with the voltage of 500V and below for power distribution control, monitoring and metering protection, mainly suitable for many places such as industrial and civil buildings, industrial and mining enterprises . JXF Series Power Distribution Box product is box assembled with various control functions by customer-selected components, and there are many box sizes and specifications and the size of the box can be customized according to the size of the installation elements. It is widely applies in industrial and civil architectures as the dynamical. Low. JXF Metal Enclosure provide Control, monitoring, measurement and protection for the electric power loops and main power controlling equipment. Customized electrical power distribution box for sale supplier in China, with excellent low voltage distribution box design team. The frame of the JXF low-voltage Switchgear is a combined structure, and the basic skeleton is assembled from C-shaped steel.
