

Jamaica Integrated Container Rack with Low Temperature Resistance

Overview

The system features heavy-duty steel construction treated with specialized coating to withstand extreme cold conditions, typically ranging from -40°F to 32°F. Are you looking for Racking or Shelving to make the most of your Warehouse Space but not exactly sure what you need or how do go about it?

Jamrak Shelving Solutions is one of the leading providers of Warehouse Racking and Shelving Solutions in Jamaica. We provide integrated Racking Solutions from. Upright frames: These vertical columns serve as the backbone for the cold storage racking system, with holes punched at regular intervals for easy connections with other parts. Load beams: Also known as. We provide advanced climate controlled systems designed for diverse needs, offering reliable performance from -22 and +131 Fahrenheit (-30°C to +55°C) with constant temperatures of +/-1 K. Almost any cargo can be carried in our containers. Whether the goods are loaded in bulk, bags, or cartons in standard containers, or out of gauge goods and project cargo on flat racks, or fruit, meat, fish and other goods requiring temperature control in reefer containers, cMA. To cope with thermal stress, several material options are available: Hot Galvanized Steel (Galva): This is a very common solution, the galvanizing process creates a protective layer of zinc that offers excellent corrosion resistance, an indispensable asset in wet and cold environments where. Refrigerated containers, also called reefers, are cold storage containers used in the shipping, truck-ing and rail industries to transport perishable items such as food and pharmaceuticals. These containers are capable of maintaining temperatures for frozen, chilled or even warm cargo through a.
