

Join our 100G aggregation switch

Overview

High-availability modular chassis and line card switches for versatile edge aggregation, core, and data center deployments. New 1G option is optimized for IoT.

1. 8 Tbps high-density 100G/25G Layer 3 Etherlighting™ aggregation switch with MC-LAG support for high availability system design. Requires a 4-post rack, or a center-mount bracket or cantilever shelf on 2-post racks for optimal support. 3ad link aggregation enables you to group Ethernet interfaces to form a single link layer interface, also known as a link aggregation group (LAG) or bundle. The LAG balances. In data-intensive, distributed campus networks, the LANCOM YS-7154CF ensures the necessary performance and high availability of network resources. With 48x 25G SFP28 and 6x 100G QSFP28 ports, the switch offers maximum connection flexibility in mixed 1G-100G environments, providing a total of 3. 6. WISI's innovative Novalink Outdoor Aggregation Switch is meticulously crafted to cater to the needs of network providers leveraging 1G/10G/25G and 100G interfaces for seamless interconnection and aggregation of devices within their network.
