

Libya 24-core optical cable

Overview

This 8,700-kilometre fibre-optic network, encompassing 24 fibre pairs and a capacity of 20 terabits per second per pair, is set to connect 11 countries across the Mediterranean, including Libya, by the end of 2025. We are one of the leading worldwide manufacturers of special cables, from fire-resistant cables to instrumentation, control cables, fire alarm cables, coaxial cables, LAN wires, and fiber optic cables. Our production facilities are some of the most advanced in the region with a total annual. Libya has formally integrated into the Medusa subsea cable system, marking a pivotal advancement in its telecommunications infrastructure. This figure reflects the total revenues of producers and importers (excluding logistics costs, retail marketing costs, and retailers' margins, which will be included in. Fiber optic cable is a cable containing one or multiple optical fibers that are used to transmit the signal. The optical fiber elements are typically individually coated with layers and contained in a protective tube suitable for the environment where the cable will be deployed. High-quality LC-LC single-mode (mono-mode) breakout installation cable for indoor (inside buildings). Black protection jacket with flexible and extremely tear-resistant pulling aid of nylon material on both ends.
