

Low-voltage intelligent distribution cabinet control

Overview

It is an intelligent product integrating data collection, communication, reactive power compensation, power grid parameter analysis, control and other functions required by the smart grid. The product can be connected to the grid control center of the courts through GPRS. ABB offers a total ev charging solution from compact, high quality AC wall boxes, reliable DC fast charging stations with robust connectivity, to innovative on-demand electric bus charging systems, we deploy infrastructure that meet the needs of the next generation of smarter mobility. ABB's Low. The intelligent low-voltage switchgear combines the intelligent power distribution monitoring terminal and the Internet of Things technology to achieve data collection and intelligent interconnection. Reliable, quality-assured products trusted worldwide. They distribute power efficiently, control current flow, and protect circuits from overloads, short circuits, and other faults.
