

Method for fixing cable tray cover plates with clips

Overview

Recommend to use 8 spring clips for all standard 3mt trays, and 6 clips on all tray fitting covers. To avoid damaging the base material or fixing attachment. Follow the recommended torque of 12 Nm. The correct installation of cable ladders and cable trays is important to help maximize the safe working load as defined by our published load tables and to minimize deflection. Typically, installation guidelines will also depend on the project specification required by the client, but this will. There are five common ways to fix the cover plate of cable tray elbow supplier: pressing plate fixing, screwing fastening, clasping fixing, padlock fixing and seven-shaped buckle fixing. The main contents. Whether you are using bolts, clips, or welding methods, choosing the appropriate installation method for your system is critical. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challenge-ience and safety.
