

Multifunctional Intelligent Instrument Distribution Box

Overview

The intelligent distribution box comprises: a distribution box body (1), wherein a distribution cavity (11) for the placement of a distribution apparatus and a tool cavity (12) for the placement of a servicing tool are arranged in the distribution box body (1), and. The intelligent distribution box comprises: a distribution box body (1), wherein a distribution cavity (11) for the placement of a distribution apparatus and a tool cavity (12) for the placement of a servicing tool are arranged in the distribution box body (1), and. The REDline Power Box M Plus is the ideal solution when the power distribution has to be positioned between the engine's and driver's compartment. The integration of a MEGA fuse on the outside of the box allows the protection of the components and creates a secured power line. It is equipped with: Digital technologies such as Cloud Computing, Big Data, Internet of Things (IoT), Artificial Intelligence (AI) and Industry 4. 0 are phenomenon which are changing the world we are living in. Google has not performed a legal analysis and. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. Compared with the traditional power distribution box, it is safer to cut off the strong power supply remotely, and it can save energy through the timing mode while controlling the.
