

# Network cabinets and circuit breakers

## Overview

A network rack cabinet or panel contains servers, patch panels, connection panels and circuit breakers in a modular assembly, bolted to ensure security and efficient organisation for large data centres, IT equipment of any structure and company servers of different sizes. Our comprehensive portfolio ensures complete system protection against overcurrent, short circuits, electric. Cabinet for a protective panel with pole-mounted circuit breaker (s) and intended for overhead LV distribution networks. LV panels ensuring and guaranteeing protection with circuit breakers in case of an overload and a short-circuit current of the network conductors and transformers on a pole from. The Power Distribution Cabinet is a versatile solution designed to efficiently distribute electrical power within various settings. A neatly designed cabinet, constructed in line. BLOCK manufactures in accordance with all standard national and international standards, such as EN, ISO, NEC as well as UL and cUL.
