

New Fiber Reinforcement Tray

Overview

Made from the highest quality pultruded materials, our Fiber Reinforced Polymer (FRP) cable tray is extremely durable and resistant to chemical attack, with a proven record of performance in the most corrosive and structurally demanding environments across the globe. Fibre casting, also known as moulded pulp, is a sustainable material produced using a wet pressing process. This involves sucking an aqueous fibre pulp made from recycled paper or cellulose into a mould and then drying it. Ebo has been part of the Niedax Group since 2010 and is one of the global market leaders in the field of GRP cable support systems. Ebo Systems was founded in 1959 in Adliswil, Switzerland. FCT FRP Cable Trays are designed specifically for electrical and instrumentation installations, utilizing corrosion-resistant fiber reinforced plastic. These trays are engineered to. Enduro cable tray (sometimes called cable ladder) sets the industry standard for high-quality fiberglass cable tray. Designed for modern industrial demands, our trays offer exceptional corrosion resistance, high strength-to-weight ratio, and. Harvest Packaging is an international specialist in moulded fibre packaging with many years of production expertise. Working in close collaboration, we develop customised inlays that meet the highest requirements for purity, precision, and stability. fully comply with the EU Packaging and Packaging.
