

# New Swedish Power Storage Solution

## Overview

Since 2023, Ingrid Capacity has partnered with BW ESS to develop 14 large-scale battery storage projects at strategically selected locations throughout Sweden's electricity grid, situated in the electricity price areas SE3 and SE4. Developer and optimiser Ingrid Capacity and energy storage owner-operator BW ESS have been. The electricity network company Ellevio is diversifying its business to help industry and companies become fossil-free through electrification. The first investment is Sweden's largest Battery Energy Storage Solution (BESS) that enables more renewable energy in the electricity system and a better. Battery Energy Storage Systems (BESS) are becoming essential to Sweden's transition toward a fossil-free energy system. While the country leads in renewable adoption—reaching 98% fossil-free electricity in 2023—intermittency from wind and solar continues to cause major grid instability and price. As Sweden's energy system races through one of the fastest storage build-outs in Europe, it's the perfect moment to take stock of who's actually leading the charge.
