

# On-site foaming of distribution boxes

## Overview

The method of on-site foaming, spraying (or pouring) polyurethane foam insulation layer, has the surface as a whole without seams, reducing heat loss, with high construction efficiency, easy to meet quality requirements, reducing construction procedures, and eliminating the. The method of on-site foaming, spraying (or pouring) polyurethane foam insulation layer, has the surface as a whole without seams, reducing heat loss, with high construction efficiency, easy to meet quality requirements, reducing construction procedures, and eliminating the. The groove contours of electronic distribution boxes and the very narrow grooves of micro-distribution housings are seamlessly sealed with the sealing foams of the polyurethane-based FERMAPOR K31 or the silicone-based FERMASIL product families. The prerequisite for the exact application of sealing. SmartFoam Machinery is a leading manufacturer of foam conversion machinery designed to help foam converters that work in the protective packaging industry. Looking for foam in place equipment?

Crown Packaging provides foam-in-place systems from top manufacturers like Sealed and Pregis. Dimension: L44m x W4m x H3m ( basic) 2.
