

On-site power distribution box level 1

Overview

On site distribution box Product Details Compliant with UL67 standards, it consists of an incoming circuit breaker and multiple outgoing circuit breakers. It adopts a plug-in structure and the busbar system is designed with full insulation. The protection level of the plug-in part. The best distribution system is one that will, cost-effectively and safely, supply adequate electric service to both present and future probable loads—this section is intended to aid in selecting, designing and installing such a system. The protection level of the plug-in part reaches IP2X. Using the types of distributor described in the equipment standards, it is possible to set up a power supply. The range of applications extends from pure energy distribution in buildings to building automation and through to industrial plants. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS. Read on! Designed and built in Canada for modern jobsites. Leviton's The Box™ is rated 50A 125/250 Volt with six (6) weather-resistant NEMA 5-20R straight blade single GFCI protected receptacles, one (1) NEMA L6-30R locking non-GFCI protected receptacle, one (1) non-GFCI protected 50A.
