

Optimal Layout of Optical Cables in Mauritania

Overview

This document discusses planning and surveying for fiber optic network routes. The West Africa Regional Communications Infrastructure Program (WARCIP) Project helped to increase the geographical reach of broadband networks and reduce the costs of communications services in Mauritania. The deployment of approximately 1,700 kilometers (km) of fiber optic cable enabled. EllaLink announced the execution of agreement with the Ministère de la Transformation Numérique et de la Modernisation de l'Administration (MTNMA) of the Islamic Republic of Mauritania for the construction, operation and maintenance of a second international subsea cable that will directly connect. These Terms and Conditions ('the Terms') govern your use of the website on the Internet located at www. The Site is owned and operated by Developing Telecoms Limited ('the Owner', 'we', 'us', 'our'). A detailed final survey is then required. Mauritania plans to install an additional 2,300 kilometers of optic fiber cable nationwide, Minister of Digital Transformation Mohamed Abdallahi Ould Louly announced on June 10th.
