

# Paraguay Active Optical Device 400G

## Overview

The 400G QSFP-DD AOC (active optical cable) is a 400 Gb/s parallel active optical cable, which transmits parallel 8x50 Gb/s PAM4 signals over multi-mode fiber (MMF) cables up to 100m. It is compliant with QSFP-DD MSA and the CMIS 4. LQD-CW400-LR4C is a transceiver module designed for 10km optical communication applications, and it is compliant with 100G Lambda MSA standard. This module can convert 8-channel 53.25Gb/s optical signals and multiplex them into a single channel for 425Gb/s. What are the benefits of moving to 400G technology?

Arista's 400G platforms allow data centers and high-performance computing environments to address growing needs for higher bandwidth at lower cost and power per gigabit. These high-speed cables are ideal for demanding. Siemon's 50G per lane PAM4 Ethernet QSFP-DD Active Optical Cable assemblies (AOCs) are designed to exceed industry standard performance offering a cost-effective, low latency, low-power option for high-speed data center interconnects. The Active Optical Cable assemblies support 400G PAM4. At the heart of this evolution are 400G Coherent Optics, which integrate optical and electrical components to enable high-speed, long-reach communication.
