

Plug on the optical splitter

Overview

Simply plug the male end of this splitter cable into the optical output of TV and plug the other two connectors to a receiver or soundbar and wireless headphones that have a base unit with a toslink port, then you can run both at the same time without having to switch optic cables. Bi-directional converter: This bi-directional digital audio converter not only supports the conversion from Toslink optical to digital coaxial or from digital coaxial to Toslink optical, but also the conversion from coaxial to coaxial or from Toslink optical to Toslink optical. 2-way optical SPDIF. □Digital Audio Splitter Cable□Direct Optical Connection without Signal Loss - no extra fiber optic cables needed. Building on this concept. The optical splitter is an important passive device in the optical fiber link. It generally has one or two input ends and many outputs end for laser signal distribution. This is ideal for sending audio from one source (Blu-ray player, game console, TV, streamer, etc. T PON standards such as GPON, XGS-PON and new 25 and 50G standards.
