

Protective opening for distribution box holes

Overview

Hole plugs prevent damage to cable systems and circuitry from dust, debris, and water ingress. They work by slotting or 'snapping' into spare or unwanted openings in electrical cabinets and enclosures. Our circuit breaker protective box shell is IP65 engineering-grade waterproof with preventing snow and rain function, provide safety protection for your circuit equipment This distribution box is Made of high quality plastic material, durable and sturdy. We partner with leading manufacturers like ALPHA WIRE. Block or seal holes in outlet boxes and enclosures to keep out debris, dust, and moisture Enclose wiring for outlets and switches or block off unused components Attach to sealed enclosures so air can flow to equalize temperature and pressure Release moisture to keep components dry Route and guard. Enclosure hole seals are designed to close and protect unused openings in electrical enclosures, helping maintain environmental integrity and system reliability. The entry seals include Multidiameter™, our innovative solution for adaptability which simplifies design, installation, and maintenance.
