

# QCS optical cable

## Overview

The QCS Fiber Optic Cable is designed for high quality transmission and diffraction limited fiber lasers. Optizone Technology has been developing and producing high power laser components since 2007, and has mass-produced Fiber Optical Cable since 2015. It is available to customize the FOC series, including the QBH, Air-cooled Fiber End Cap, Large Beam Collimator with different wavelength and power. They can handle extreme temperatures, weather, shocks, vibrations, and corrosive conditions—far beyond what standard cables endure. Featuring IP67-rated connectors, these assemblies ensure. Just fill the form below and let us know how we can help you. Get reliable, low loss cables for delivering multi-kW laser beams over long distances — they're rugged enough to perform consistently, even in harsh environments. Dayoptics' QCS collimators provide excellent beam.
