

Sepam series relay protection devices

Overview

These multi-functional protection devices allow an easy and hassle-free startup with simple-to-use programming software. Sepam relays also comply with the latest communication protocols on the market, including IEC61850, DNP3 and Modbus. "16 types of digital current or voltage protection for any distribution system, each one dedicated to a single application: Easergy Sepam S80, S81, S82, S84, T81, T82, T87, M81, M87, G88, B80, B83, C86. A ready to use Easergy Sepam includes: one base unit, two 20 pin connectors, one current, one. Sepam Series 80 protection relays are time-tested, high-performance devices that ensure dependability. These products are designed with a simple idea in mind: All users should be able to find a solution corresponding exactly to their needs with the right balance between performance, simplicity and. Sepam protection relays, the product of exper, comply in medium-voltage public and industrial distribution networks. It is made up of four series of relays with increas mer or feed Sepam 10, the first multi-functional, digital protection relay. The vamp is an expert in communication with fast experience in interfacing different system integrators SCADA, RTUs, PLCs, and gateways using large numbers of supported protocols.
